

Product | Product group Door Communication

The ABB-Welcome fingerprint module determines right of access by scanning the fingerprint. The integrated line sensor can learn and recognize up to 64 different users. Programming is carried out directly on the module or via a web browser (requires IP gateway 83342-500). Additional devices are not required for commissioning.

As a module of the ABB-Welcome solution from Busch-Jaeger the fingerprint module is, of course, subject to protection type IP 44 and is totally weatherproof.

**Overview of colours.**

The ABB-Welcome fingerprint module, which is robust and resistant to environmental influences, is available in stainless steel (brushed) and studio white matt (metal-coated).

**Available stations.**

The ABB-Welcome outdoor station with fingerprint module can be ordered as a standard single module or integrated in the outdoor station. Additional versions customized to customer requirements are also available upon request.

**Versions customized to customer requirements.**

The access control modules from ABB-Welcome can be integrated into all existing versions of the outdoor station upon request by the customer. For example, upon request by the customer the 12gang outdoor video station with fingerprint module can be used for the specific opening of the front door. It can also be installed in the ABB-Welcome outdoor audio station.
